AI ENGINEER • AGENTIC AI • GENERATIVE AI • RAG / LLM APPLICATIONS

SUMMARY

AI Engineer with hands-on, production-style experience building Machine Learning, Generative AI and LLM applications using Python, FastAPI, LangChain and LangGraph. Skilled in multi-step agent workflows including planning, retrieval, tool/function calling, memory, self-correction and human-in-the-loop checkpoints. Strong foundation in data structures, algorithms, SQL, REST APIs, transformer-based NLP, PostgreSQL/MySQL, Redis, Docker/Linux and Git/GitHub.

EXPERIENCE

React Developer | Hezee Access IT Infrastructure Pvt Ltd, Bengaluru | Oct 2025 – May 2026

- Built scalable React.js/Next.js applications integrated with secure JSON-based REST APIs and reusable components.
- Developed a hotel booking calendar supporting real-time scheduling, reservation management and conflict detection.
- Used Git/GitHub and Agile practices, including debugging and code review, for collaborative software delivery.

SELECTED PROJECTS

Autonomous Software Engineering Agent (ASEA) — Python, LangGraph, LangChain, LLMs, FastAPI, Docker, Git/GitHub

- Multi-agent workflow with Researcher, Planner, Coder, Tester and Reviewer roles for repository analysis, coding, testing and verification.
- Self-correction and failure-analysis loops, Docker sandboxing, Git branch/PR automation and human-in-the-loop approval checkpoints.

E-Commerce Sentiment Analysis Engine — Sentipulse — Python, FastAPI, Hugging Face Transformers, PyTorch, PostgreSQL, Redis, React, TypeScript, Docker

- Full-stack review intelligence platform for document extraction, transformer-based sentiment classification and confidence analytics.
- React + TypeScript dashboard visualizes sentiment metrics end-to-end; backend services expose JSON/HTTP REST APIs and support containerized deployment.

Medi+ Wellness — AI Healthcare Appointment & Assistant Platform — React, TypeScript, FastAPI, PostgreSQL, Redis, Docker, Hugging Face

- AI healthcare platform combining appointment scheduling with an LLM-based conversational assistant.
- Redis distributed slot locking, PostgreSQL row-level locking and Idempotency-Key protection help prevent double bookings; Docker/Docker Compose supports reproducible deployment.

TECHNICAL SKILLS

Programming & CS: Python, JavaScript, TypeScript, Data Structures & Algorithms, SQL | **AI/ML:** Machine Learning, Deep Learning, Hugging Face Transformers, PyTorch, NLP, Sentiment Analysis | **GenAI:** LLMs, Prompt/Context Engineering, OpenAI, Anthropic Claude, Gemini, LangChain, LangGraph, RAG, FAISS, ChromaDB | **Backend/Data:** FastAPI, REST APIs, JSON, HTTP, PostgreSQL, MySQL, Redis | **Engineering:** Docker, AWS, Linux, Git, GitHub, CI/CD, Agile, SDLC | **Frontend:** React.js, Next.js

EDUCATION & CERTIFICATION

Master of Computer Applications (MCA) — Bharathiar University, Coimbatore | 2020 – 2022 • IBM Generative AI Engineering Professional Certificate | 2025
